

It's Time to Upgrade Your POS

With advances in technology, EMV security, PCI compliance, and the always increasing demands from your customers for faster safer transactions, more rewards and a better overall experience, the need to upgrade your POS has never been greater.

CBE delivers the quality

Looking for long-term partnerships, not a short-term deal
Over 150 certified company employed technicians in 36 states
Paperless service call and inventory tracking with CBE Mobile
Verifone Authorized Service Contractor for 25+ years
Maintenance programs and special financing available

Commander Site Controller

Lightning fast transactions—100% IP data transfer
Expandable architecture, built with room to grow protects investment
Commander Console allows remote connectivity for viewing real time sales, change gas prices, and much more
Compatible and universally accepted across all fuel brands
Works with all dispenser types, backoffice and loyalty systems

Ruby2 Touchscreen Technology

Easy to learn and navigate, cuts training and transaction times down
Durable, designed for the harsh fast paced C-store environment
28 years of being the industry leader in the C-store POS market

Ruby2 Touchscreen

Mx915 Pinpad w/Stand

Commander
